Foreword

This report continues the annual release of information on enrollment and reimbursements by State and county under Medicare. In previous years these data had been published in a report not included in this series. For each State and county and for groups of metropolitan and nonmetropolitan counties, this report provides figures on the number of persons enrolled under Medicare as of July 1, 1972 and the amounts reimbursed during calendar year 1972 to, or on behalf of these insured. The presentation of these data is further subdivided into the two types of coverage available under the program—hospital insurance and supplementary medical insurance.

Many individuals in the Social Security Administration have assisted with the development of this series. The preparation of these reports is a major function of the ORS Division of Health Insurance Studies under

the supervision of Howard West, director, and Newton Dikoff, staff director, Management Statistics. Text preparation was the responsibility of Charles Owen of the Management Support Statistics Branch. Important contributions for the tabulation and presentation of the statistical content of this report were made by Irving Goldstein and Robert Dickerson of the Statistical Processing Branch of that division. Special acknowledgment for computer services are made to the Division of Health Insurance Statistical Data, Bureau of Data Processing.

The General Tables were produced by the "System for Automated Tabular Composition," a computer system at the Social Security Administration headquarters in Baltimore, Maryland. They were photo typeset on Linotron equipment at the Government Printing Office in Washington, D.C.

THIS PUBLICATION is a section of a statistical report series produced from Medicare program records. Presented on a calendar year basis, describing services rendered in the year, the series includes sections on enrollment, characteristics of providers, inpatient hospital care, outpatient hospital services, home health services, physicians' and other medical services, and overall summaries.

The primary objective of these reports is to provide data required to measure and evaluate program operation and effectiveness. Benefit payment operations furnish information about the amount and kind of hospital and medical care services used by persons aged 65 and over, as well as the expenditures for such services. The applications by hospitals, extended care facilities, home health agencies, and independent laboratories to participate in the program provide data on the characteristics of such providers of services. The claim number assigned to each individual serves as the link between the program services utilized and the demographic characteristics of each individual recorded in the health insurance entitlement master file.

The data-collection system has two inherent characteristics that determine the scope, detail, and flexibility of the available data. First, data are collected and maintained on an individual basis so that the beneficiary and his medical experience under the program form the basic unit. Second, records for each bill paid under the program and, for a sample of beneficiaries, records of diagnoses and surgical procedures are maintained on a centralized basis. Except for intermediary operating statistics such as those relating to workloads, costs, and the like, all program statistics are centrally prepared.

THE BASIC RECORDS

The statistical system is based on five related computer-tape records: the health insurance entitlement master file, provider record, hospital insurance (part A) utilization record, medical insurance (part B) payment record, and the record containing information from medical insurance bills for a 5-percent sample of supplementary medical insurance enrollees.

THE HEALTH INSURANCE ENTITLEMENT MASTER FILE

The health insurance entitlement master file identifies each aged person eligible for health insurance benefits and indicates whether he is entitled to hospital benefits, to supplementary medical insurance benefits, or to both of these benefits.

This record is used to create a health insurance card that is sent to each insured person. The card contains the individual's claim number (the number used for OASDI or railroad retirement programs). It indicates the entitlement of the individual for the two parts of the Medicare program.

The entitlement record provides the population data for each part of the program and therefore serves as the base for the computation of a variety of utilization rates, limited only by its demographic content.

PROVIDER RECORD

Every hospital, home health agency, extended care facility, and independent laboratory must apply for participation in the hospital insurance program in order to be reimbursed for services provided. Data included on the application forms have been recorded in the central provider record and are updated as facilities are recertified periodically, as new ones apply for participation, or as some leave the program. When the information in this provider file is combined with utilization data, it serves to relate the characteristics of facilities and agencies that provide care to the kinds and amounts of service used by persons insured under Medicare.

UTILIZATION RECORD FOR HOSPITAL INSURANCE

The administration of the hospital insurance program requires that two items of information be known about each person at the time of his admission to a hospital—his entitlement under the program and the extent to which he had used the benefits available to him under the "benefit period" concept.

When the patient is admitted to a hospital, the admission section of the inpatient hospital admission and billing form is completed by the hospital and forwarded through its intermediary to the Social Security Administration for recording in the central record. As soon as the record is checked, normally in less than 24 hours, the intermediary is informed of the patient's benefit status and of the number of days remaining during the "benefit period."

This information is then forwarded to the hospital. At discharge, the hospital completes the billing section of the form and sends it to the intermediary for payment. When approval for payment has been made, the intermediary forwards the claim to the Social Security Administration for inclusion in the central record.

Medicare Program

As part of this process, information on diagnoses and surgical procedures are coded for a 20-percent sample of beneficiaries based on specific combinations of digits in the health insurance claim number. Copies of admission and billing forms are handled in a comparable manner by home health agencies and extended care facilities. The outpatient billing form is also transmitted to the Social Security Administration for recording in the central record after the bill is approved for payment by the intermediary.

All the information on utilization experience in hospital and extended care facilities that is needed to administer the "benefit period" provision is recorded in the central record. This information includes stays in certain nonparticipating institutions that meet the definition of a hospital or extended care facility under the law, and days of care not covered or reimbursable under the program.

Each admission and billing form contains both the beneficiary's claim number and the provider's identification number. The resulting tape record can be readily matched to the beneficiary files and the provider files. By this process, a statistical tape record is created for the sample of insured persons that contains all the available information needed for tabulation from the three files related to part A utilization.

PAYMENT FOR MEDICAL INSURANCE

Payment or reimbursement under the SMI program is made only after receipt by the carriers (intermediaries involved in Part B of the Medicare program) of bills having allowed charges exceeding \$50 during a calendar year period.

For the insured population, carriers need to know from a central source that the deductible has been met; thereafter, during the remainder of the calendar year, the only additional information required from the Social Security Administration for reimbursement or payment purposes is whether the person is still enrolled under the SMI program.

For administration and operation of the program, the Social Security Administration must have accurate and complete information on the amounts paid by the carriers for physician services and for other services and supplies under this part of the program. To meet these needs, carriers furnish a payment record consisting of tape, punched card, or other machine-readable record of each bill paid. A "bill" is defined as a request for payment from or on behalf of a beneficiary as the result of services provided by a single physician or supplier.

The payment record also contains selected items of information needed to supply an efficient basis for drawing samples of the bills. These items provide a sampling frame that may be used to draw additional samples designed to obtain specific information not furnished reliably by the basic sample of enrolled persons under the medical insurance program.

THE MEDICAL INSURANCE SAMPLE

Although the payment record provides a rapid method for summarizing payment data and a sampling frame for efficiently drawing additional samples of bills, it does not provide specific data on diagnoses, procedures, and related charges.

Basic statistics on the utilization of physician and other services covered under the supplementary medical insurance program are derived from bills paid by intermediaries to or on behalf of a continuous 5-percent sample of all enrolled persons. Intermediaries have been given specific combinations of digits of the health insurance claim number to be used in selecting the 5-percent sample, which is a sub-sample of the 20-percent sample used for hospital insurance program data.

Bills are submitted either directly on an SSA request for payment form, or on the SSA form in combination with the physicians's billing form. Both methods are designed to provide information on the date and place of each service, the procedure carried out or service provided, the condition treated (diagnosis), and the physician's or supplier's charge for the specific service.

All of the bills of persons in the 5-percent sample to or for whom payment is made under the program, including those used to meet the annual \$50 deductible, are included in the sample and coded. However, data are not available through these procedures for persons in the sample who do not meet the \$50 deductible. Such data are collected by means of the Current Medicare Survey, with data made available in a separate report series.¹

For hospital-based physicians who have authorized the provider to collect the fee for their services, the provider billing for patient services by physicians form is used. This form is completed for each patient. It includes descriptive information on the date and place of each service, the diagnoses, procedures, and the charges. These bills are received centrally for the 5-percent sample of persons enrolled for supplementary medical insurance.

Reimbursements, 1972

This report, containing data for calendar year 1972, summarizes enrollment and reimbursements by State and county under the Medicare program. Reimbursements made during 1972 are shown for each State in table 1, by county in table 2, and for groups of metropolitan and nonmetropolitan counties by State in table 3. Current reimbursement amounts for the program as a whole are published monthly in the Social Security Bulletin.

The Medicare health insurance for the aged program makes available two separate but coordinated coverages—hospital insurance (HI), covering nearly all persons aged 65 and over, and supplementary medical insurance (SMI), covering those persons in this age group who enroll voluntarily and pay the required premiums. Reimbursements for hospital insurance and supplementary medical insurance, presented in tables 1–3, represent amounts paid in 1972 to, or on behalf of, insured persons.¹ The amounts are based on information from bills entered in Social Security Administration records through June 1973 and are listed according to the State and county of the beneficiary's residence. Only payments for covered services provided to enrollees are included in the amounts reimbursed; costs of administration, as well as deductibles, copayment amounts, and noncovered services specified by law, are excluded. Re-

imbursements under supplementary medical insurance to group practice prepayment plans dealing directly with the Social Security Administration, totaling \$34 million in 1972, are also excluded from the reimbursement data. However, the enrollment figures shown in tables 1–3 include about 300,000 members of such plans.

The amounts reimbursed under the hospital insurance portion of the program are based on interim rates which will be adjusted after the end of each provider's accounting year on the basis of reasonable costs of operation; this is also true of reimbursements for home health and outpatient services. During calendar year 1972, such retroactive adjustments totaled over \$242 million under hospital insurance and about \$113 million under supplementary medical insurance. Other payments under supplementary medical insurance are based on "allowed" (reasonable) charges for medical services determined on the basis of customary and prevailing charges.²

Reimbursement amounts included in this report reflect the date of payment, rather than the date the service was rendered. As a result of the lag in processing bills, an estimated \$175–225 million under hospital insurance and about \$1–10 million under supplementary medical insurance are not included in the reimbursement amounts. Differences in lags in submitting bills among providers and in making payments among the intermediaries and carriers serving the various geographic areas shown in the tables are, of course, reflected in the amounts reimbursed.

² For more detailed information on how allowed charges are determined see "Provisions of the Law and Regulations."

¹ Amounts included in this report are based on all bills processed through June 29, 1973, with approval dates in 1972, plus bills processed from July 6, 1972 through June 29, 1973, with approval dates prior to 1972. The bills for earlier years were received too late to be included in reports covering those years.

Amounts reimbursed and the average monthly reimbursement per person enrolled since the start of the health insurance program are shown below. The figures are based on data extracted from this report and similar reports published previously covering prior years of Medicare.

For both portions of the program, hospital insurance and supplementary medical insurance, amounts reimbursed and per capita reimbursements have consistently increased from the beginning of Medicare through calendar year 1972. Part of the rapid rise in per capita reimbursement during the earlier years of the program represents the lag in the submission and payment of bills in 1968 for services rendered earlier. Also contributing to both this rise in earlier years and increases in per capita reimbursement through 1972 were increases in hospital costs and physician charges.³ From 1971 to 1972, per capita reimbursements for both benefits, hospital insurance and supplementary medical insurance, rose 7 percent to \$23.03 and \$8.94, respectively.

Year	Amounts reimbursed ¹			
	Hospital insurance		Supplementary medical insurance	
	Total (in millions)	Monthly average per person enrolled ²	Total (in millions)	Monthly average per person enrolled ²
July 1966–				
December 1967 –	\$3,840	\$11.04	\$1,305	\$4.06
1968 –	3,767	15.88	1,523	6.75
1969 –	4,597	19.14	1,670	7.25
1970 –	4,740	19.40	1,832	7.79
1971 –	5,358	21.53	1,996	8.33
1972 –	5,836	23.03	2,184	8.94

¹ Under the hospital insurance program, actual benefit payments as represented in trust fund transactions differ from amounts reimbursed as shown in this table, which represents payments for covered services, based on an interim rate (either per diem or a percent of total charges) and adjusted at the end of each provider's operating year on the basis of audited reasonable costs of operation. Payments exclude deductibles and coinsurance amounts and noncovered services as specified by law. Under the supplementary medical insurance program, amounts reimbursed to or in behalf of the beneficiary generally represent 80 percent of the allowed charges, once the beneficiary has satisfied the deductible for the current year. Some radiology and pathology services are reimbursed at a 100-percent rate regardless of the beneficiary's deductible status.

² Figures based on number of persons enrolled as of midpoint of time period.

³ See Charles B. Waldhauser, "Health Insurance for the Aged: Monthly Reimbursements Per Person by State, 1971," *Health Insurance Statistics*, HI-52, December 5, 1973.

Provisions of the Law and Regulations

The Medicare program, enacted on July 30, 1965 as Title XVIII of the Social Security Act, became effective on July 1, 1966. The program makes available two separate but coordinated insurance coverages—hospital insurance, covering nearly all persons aged 65 and over, and supplementary medical insurance, covering those persons in this age group who enroll voluntarily and pay the premium.

Hospital Insurance Program

The hospital insurance (HI) program pays for part of the costs of inpatient hospital care and related health care services provided by extended care facilities and home health agencies following a period of hospitalization. For the services to be covered, they must be provided by institutions and organizations which have been certified as qualified providers of services and which have signed an agreement to participate in the program.¹ An exception exists under special provisions for hospitals certified to provide only emergency services.

As described in more detail below, the program is financed by a tax on a portion of current earnings and, to a certain extent, by general tax revenues.

BENEFITS

The law provides maximum limits on the benefits which may be covered under the HI program. These limits are established based on the concept of a "benefit period." A benefit period begins with the first day of hospitalization and ends when the individual has not been a bed patient in a hospital or skilled nursing home for 60 continuous days.

Requirements for payment by the individual of an inpatient hospital deductible and coinsurance amounts also are established by law, with the Secretary of Health, Education and Welfare authorized to set the deductible amount each year in accordance with a speci-

fied procedure. By law, the deductible amount automatically determines the coinsurance amounts for each type of service under the HI part of the program.

Inpatient hospital benefits.—Covered hospital services include room and board in accommodations containing from two to four beds, nursing services (except for private-duty nursing), drugs and biologicals, and all those services ordinarily furnished by a hospital to its inpatients. The program does not cover the services of physicians (including staff radiologists, anesthesiologists, pathologists and physiatrists) except for services provided by interns or residents under approved teaching programs in a hospital.

The program pays for the "reasonable costs" of covered services in a participating hospital for up to 90 days in a "benefit period." Full payment is made for the first 60 days of hospitalization less the deductible of \$60 for services received in benefit periods starting in 1971. For each of the remaining 30 days in the benefit period, the patient pays a coinsurance amount of \$15 a day (one-fourth of the inpatient hospital deductible).

Each hospital insurance beneficiary also has a "lifetime reserve" of 60 additional hospital days, which can be used at his option whenever he has exhausted the 90 days covered in a benefit period. Lifetime reserve days are subject to a copayment of \$30 a day (one-half of the inpatient hospital deductible).

The cost of the first three pints of blood (or equivalent amounts of packed red blood cells) furnished a patient during a benefit period is also deductible unless the patient arranges for replacement. Charges for any additional blood are covered under the program.

The program also pays for emergency services in a nonparticipating hospital. Each nonparticipating hospital providing emergency services elects whether to claim payments from the Medicare program or from the beneficiary for emergency services rendered beneficiaries in a given year. If the hospital elects to bill the program, reimbursement is made under the program as described above. In other cases, the beneficiary claims direct payment and submits the itemized bill to Social Security Administration. In this case, reimbursement is based on reasonable charges for covered services and amounts to 60 percent of reasonable charges for room and board plus 80 percent of such charges for ancillary services. Payment is subject to the deductible and coinsurance provisions of the law.

¹For certification requirements see Social Security Administration, *Medicare: Health Insurance for the Aged, 1968, Section 3: Participating Providers* (Washington, D.C.: U.S. Government Printing Office, 1971).

Inpatient tuberculosis and psychiatric hospital services are covered as hospital insurance benefits. However, there is a lifetime limit of 190 days of care in a psychiatric hospital. Where an individual is a patient in a participating psychiatric hospital at the time he becomes entitled to hospital insurance, the number of days he was such an inpatient in the 150-day period immediately prior to his eligibility are deducted from his days of entitlement to inpatient psychiatric care in that benefit period but not from the lifetime limitation.

Extended care facility benefits.—Covered extended care services may include nursing care; bed and board; physical, occupational or speech therapy; drugs and biologicals; medical services of an intern or resident-in-training of a hospital having a transfer agreement with the extended care facility (ECF); and other necessary health care services generally provided by extended care facilities.

The program pays for the reasonable cost of all covered inpatient services in participating ECF's for up to 100 days in a benefit period. Benefits are payable only following discharge from a hospital after a stay of 3 consecutive days or more, provided admission to an ECF occurs within 14 days of discharge. Full payment is made for the first 20 days. For each of the remaining 80 days, the patient pays a coinsurance amount of \$7.50 a day (one-eighth of the inpatient hospital deductible) as required by law.

Post-hospital home health benefits.—Covered home health services may include part-time or intermittent nursing care; physical, occupational, or speech therapy; part-time or intermittent services of a home health aide; medical supplies (other than drugs and biologicals) and the use of medical appliances; and, in certain cases, services of an intern or resident-in-training of a teaching hospital. The services must be furnished by or under arrangements of an approved home health agency.

Coverage under HI provides for payment of the reasonable cost of up to 100 home health visits after the beginning of one benefit period and before the beginning of the next. In addition, the visits must occur in the year following a beneficiary's most recent discharge from a hospital stay of at least 3 consecutive days or from a covered ECF stay. A home health plan must be established by the patient's physician within 14 days after the hospital or ECF discharge. The home health services must be necessary for further treatment of a condition for which the patient received services in the hospital or ECF.

Supplementary Medical

Insurance Program

The supplementary medical insurance (SMI) program provides coverage for a variety of medical services and supplies furnished by physicians or others in connection with physicians' services. Individuals 65 years of age and

over may enroll in the program regardless of whether they are eligible for monthly social security benefits. Premiums are paid by or on behalf of all enrollees, and are matched by the Federal government from general revenues.

BENEFITS

Physicians' services covered under the program include home, hospital, and office visits. The program also pays for other services and supplies, such as: drugs and biologicals that cannot be self-administered if they are furnished as a part of a physician's professional service; diagnostic X-ray tests, diagnostic laboratory tests, and other diagnostic tests; X-ray, radium, and radioactive isotope therapy, including materials and the services of technicians; surgical dressings, splints, casts, and other devices used for reduction of fractures and dislocations; purchase or rental of durable medical equipment such as oxygen tents, hospital beds, and wheel-chairs used in the patient's home (including an institution used as his home); ambulance service where the use of other methods of transportation is contraindicated by the individual's condition; prosthetic devices (other than dental) that replace all or part of an internal organ; leg, arm, back, and neck braces; artificial legs, arms and eyes, including replacement if required because of a change in the patient's physical condition; and home health visits provided by a certified home health agency in accordance with a home health plan established by the patient's physician (no prior hospitalization is necessary). Payment may be made up to 100 home health visits in a calendar year without regard to similar services received under the HI program.

Also covered are hospital services incident to physicians' services rendered to outpatients, and outpatient physical therapy services.

In each calendar year a deductible of \$50 must be satisfied before payment may be made under the SMI program (with one exception noted below). Bills count toward the deductible on the basis of incurred rather than paid expenses; only charges allowed under the program count towards the deductible. To preclude the possibility of a beneficiary having to meet a deductible twice in a short period of time, a "carryover" provision is applied. Accordingly, covered expenses incurred in the last quarter of the year and counted towards the deductible in that year are also credited toward the deductible for the following year.

After the deductible has been met, the SMI program pays for 80 percent of the allowed (reasonable) charges for covered physician services and most other medical services. However, deductible and coinsurance requirements do not apply to the services of radiologists and pathologists furnished to hospital inpatients. "Reasonable" charges for such services are completely reimbursed. Hospital services incident to outpatient care, and home health services are subject to the deductible, and are reimbursed on the basis of 80 percent of reasonable costs.

The law sets special limits on the payment which may be made for outpatient treatment of mental illness: recognition of incurred expenses is limited to the lesser of \$312.50 or 62.5 percent of actual expenses in a calendar year. Since only 80 percent of allowed charges may be reimbursed, the effect is to limit payment to \$250 or 50 percent of the allowed charges in any year after the deductible has been met, whichever is less.

Eligibility

The hospital insurance program.—Almost all persons aged 65 and over are eligible for benefits under the hospital insurance program. Included are those persons in this age group who are entitled to monthly social security cash benefits or payments from the railroad retirement system. Further, a special transitional provision provides eligibility for certain persons who do not qualify for monthly cash benefits on the basis of their own wage record or as a dependent or survivor of an insured worker. The provision applies, generally, to persons age 65 or over who (1) attained age 65 before 1968 or (2) attained age 65 after 1967 with not less than three quarters of social security coverage, whenever acquired, for each calendar year elapsing after 1966 and before the year in which he attains age 65. For persons who reach age 65 after 1968, the amount of work credits (quarters of coverage) needed increases by three quarters each year—six quarters are needed by those who reached age 65 in 1969, nine by those who reached age 65 in 1970 and so on.

Federal employees who retired from the Federal service after July 1, 1960, and who had the opportunity to be covered under the Federal Employees Health Benefits Act of 1959, are ineligible for hospital insurance benefits under the transitional provisions. Also ineligible are aliens with less than 5 years of continuous residence in the United States, and those persons convicted of crimes against the security of the United States.

Hospital insurance protection can be retroactive for as many as 12 months before the month an individual files his application for entitlement. For example, an individual may apply 11 months after he attains age 65 and still be entitled to benefits from the month he attained age 65.

Supplementary medical insurance.—Persons entitled to benefits under the hospital insurance program, retired federal employees, and persons not eligible for hospital insurance under the transitional provisions may voluntarily participate in the SMI program.

Enrollment.—Individuals may enroll in the SMI program only during specified periods—the initial and the general enrollment periods. The initial enrollment period begins with the third month preceding the one in which an individual attains age 65 and ends 3 months after the month of attainment, a total period of 7 months. If he enrolls during the 3 months prior to the month in which he attains age 65, his coverage is effective

with the month in which he attains age 65; if he enrolls during the month he attains age 65, his coverage begins the following month; if he enrolls in any of the 3 months after he attains age 65, his coverage begins from 2 to 3 months after enrollment, depending on how long he waited before enrolling.

Beginning with 1969, there are general enrollment periods from January 1 through March 31 of each year for those who did not enroll in their initial enrollment period, or who previously terminated their enrollment and wish to re-enroll. For 1969 and later years, a person who enrolls during a general enrollment period becomes covered under SMI beginning with July 1 of the year in which he enrolls. An eligible individual must enroll within 3 years after the end of his initial enrollment period or within 3 years after termination of prior enrollment. Re-enrollment is allowed only once.

A State may enroll otherwise eligible individuals who receive cash payments under public assistance programs or are otherwise eligible for medical assistance under Title XIX if a) prior to January 1, 1970 the State requested that a State-Federal enrollment agreement be established and b) the State pays the necessary premiums. Enrollment terminates with the beginning of the month following the month of death. Social Security and railroad retirement beneficiaries may give notice of their desire to withdraw from the SMI program at any time and their coverage will be terminated at the close of the following calendar quarter. Other enrolled persons may terminate their coverage by withholding payment of premiums or by notifying the Social Security Administration in writing of the desire to withdraw from the program. The enrollee is provided a 90-day grace period for the payment of overdue premiums after which coverage is automatically terminated.

Financing the Program

Hospital insurance.—The hospital insurance program is financed primarily through a schedule of increasing tax rates on a portion of current earnings in employment covered under the Social Security Act. The maximum amount of annual earnings to which the rates are applied began at \$6,600 for calendar year 1966; it increased to \$7,800 effective with 1968 and \$9,000 beginning with 1972.

The same tax rate applies to employees, employers, and self-employed persons. The rate was 0.60 percent for each year 1968-72. The proceeds of this tax, and monies collected from the railroad retirement system (with respect to the coverage of railroad retirement beneficiaries) are placed in a Hospital Insurance Trust Fund from which reimbursement for all benefits and administrative expenses incurred under the hospital insurance program is made. The Hospital Insurance Trust Fund is reimbursed from general tax revenues for the cost of providing coverage for the persons who qualify for hospital insurance under the transitional provisions. For 1971, there were about one million such persons, a decrease from the 2.6 million who so qualified in 1966.

Supplementary medical insurance.—Premiums are paid into the Federal Supplementary Medical Insurance Trust Fund by those persons enrolled for supplementary medical insurance (or on their behalf), and a matching amount is paid by the Federal Government from general revenues. Benefits and administrative costs are paid from monies in the SMI Trust Fund.

The premiums of persons receiving social security cash benefits, railroad retirement, or Federal Civil Service annuities are deducted from their monthly benefit checks. Persons not receiving monthly benefits are billed quarterly for premiums by the Social Security Administration or the Railroad Retirement Board and have a 90-day grace period in which to make payment. Premiums may be paid for as long as a year in advance, and for individuals financially unable to make quarterly payments, arrangements can be made for monthly payments.

Amount of premium.—The Secretary of HEW is directed by law to determine the SMI basic premium rate on an annual basis. The dollar amount is required to be sufficient to produce revenue equal to one half of the expected benefit and administrative costs payable under SMI during the period for which the premium rate applies. The rate is determined in December of each year and is applicable for 12 months beginning with the following July.

The premium rate in the first half of 1971 was \$5.30 per month. The rate was raised to \$5.60 effective July 1971.

Administration of the Program

Hospital insurance.—Under the hospital insurance part of the program, groups or associations of providers, on behalf of their members, may nominate a national, State, or other public or private agency or organization to serve as intermediary in the claims process. A member of an association is free, however, to receive payment from an approved intermediary other than its association's nominee, if approved by the Secretary and agreeable to the intermediary selected. In addition, a provider may deal directly with the Social Security Administration.

The Secretary may enter into an agreement with a nominated organization if he finds this to be consistent with effective and efficient administration of the hospital insurance program. The intermediary makes payments to providers for covered items and services on the basis of reasonable cost determinations and assists in the application of safeguards against unnecessary utilization of covered services. The agreement may also call for (1) furnishing consultative services to assist providers to establish and maintain necessary fiscal records and otherwise qualify as providers of services, (2) serving as a center for communicating with providers, and (3) making audits of provider records. Hospital insurance intermediaries also make payments for home health and outpatient hospital services covered under medical insurance.

Requests for Medicare payment for covered services generally are submitted by the provider of services; they must be signed by the beneficiary (or someone for him, if he is unable to do so). The provider is reimbursed on the basis of reasonable costs of covered services and bills the beneficiary for deductible and coinsurance amounts as well as for services not covered by the program.

In some instances, hospitals may bill the program for physician services rendered to inpatients. In these cases, payment is made by the HI intermediary. Depending on the nature of the billing, funds are transferred from the SMI trust fund to the HI trust fund to cover the cost of these services, or are paid directly from the SMI trust fund.

The intermediary selected by the provider reviews claims for payment and pays the provider. Actual payment is made on the basis of an interim rate established between the provider and the intermediary. Final settlement for each provider's operating year is made on the basis of a cost report submitted by the provider, and subject to an independent audit.

No payments can be made to Federal facilities except for emergency services, unless the provider serves as a community institution. In addition, payment cannot be made to a provider for those services it is obligated to render at public expense under Federal law or contract.

Supplementary medical insurance.—Under the medical insurance program, the Secretary of Health, Education, and Welfare may enter into contracts with carriers for the performance of specified administrative functions. The carriers' principal function is to determine whether charges are allowable (reasonable) and to make payment. Carriers also have the authority and responsibility to determine, in a given case, whether a claim is for a covered service and to deny claims for noncovered or excluded items or services. In addition, carriers are to assist in the application of safeguards against unnecessary utilization of services.

The law requires that in determining allowed (reasonable) charges, carriers should take into account the customary charges of physicians and other suppliers of medical services and the prevailing charges in the locality for similar services. The law also specifies that the allowed (reasonable) charge for a service may not exceed the charge applicable for a similar service and under comparable circumstances to the carrier's own policyholders and subscribers. The allowed charge, therefore, is a charge for a service which in the absence of unusual circumstances or medical complications is the lowest of the following: (1) the actual charge of the physician or other person rendering the service, (2) the charge the physician or other person customarily makes for similar services, (3) the prevailing charges in the locality for similar services.

Customary and prevailing charges are recalculated each fiscal year based on charges in the calendar year preceding the start of the fiscal year. Beginning January 1, 1971, the upper limit of prevailing charges was set by regulation at the 75th percentile of the customary charges (weighted by frequency) made for similar services. Thus, increases in prevailing charges recognized by

the carriers beginning in January 1971 were limited to the levels established by the 75th percentile of calendar year 1969 customary charges. Similarly, increases in prevailing charges recognized by carriers beginning July 1, 1971, have been limited to the 75th percentile of calendar year 1970 customary charges.

Claims for payment of SMI benefits may be submitted to the carrier either by the patient or by the physician or other supplier of services. If the patient submits a claim (an itemized bill) directly to the carrier, he receives direct payment of benefits for covered services; he remains responsible for the physician's (or supplier's) bill. The patient may assign the benefits to a physician or other supplier of services willing to accept assignment. In this case, the physician (or supplier) agrees that the allowed or reasonable charge determined by the carrier is the total charge. The physician (or supplier) submits the bill and is reimbursed. In this situation, the patient remains responsible for the remaining 20 percent of the allowed charges for covered services and the \$50 deductible (if applicable to the current bill).

Services furnished by group practice prepayment plans (GPPP) to members are normally rendered in return for predetermined premium payments. In these cases Medicare reimbursement is made directly to the GPPP. A GPPP which exercises the option provided by law to be paid 80 percent of the reasonable cost of services (in lieu of 80 percent of the allowed charge for such services) generally deals directly with the Social Security Administration. Plans which choose to be paid on the basis of allowed charges are reimbursed by the SMI carrier.

The 1967 amendments to the Social Security Act introduced a time limit on filing of claims. For bills incurred in the supplementary medical insurance portion of the program after March 1968, claims must be filed no later than the close of the calendar year following the year in which the services are furnished. For services provided during the last 3 months of the calendar year, bills may be submitted through the end of the second year following.

General Tables

1 974 + 1 975

Notes

Health Insurance for the Aged.—The program, commonly known as Medicare, that pays for part of the costs of hospital and medical services for participating persons aged 65 and over.

Number of Persons Enrolled.—Represents those persons enrolled for coverage in the program, as of July 1, 1972—the midpoint of the calendar year, as shown by information entered in social security records through March 1973.

Hospital and/or Supplementary Medical Insurance.—All persons aged 65 and over who enroll under hospital insurance and/or supplementary medical insurance. This total is larger than the total for hospital insurance because a small number of persons are eligible for medical insurance but not for hospital insurance.

Amount Reimbursed.—Represents amounts paid in 1972 to, or on behalf of, insured persons. Also included is about \$203 million representing bills paid in earlier years but received too late to be included in reports covering those years. The amounts are based on information from bills entered in Social Security Administration records through June 1973. Amounts reimbursed shown under the hospital and/or medical insurance and the hospital insurance columns for the District of Columbia were adjusted to include an estimated \$4 million that was incorrectly allocated to calendar year 1973 as a result of errors made in completing billing forms.

Geographic Classifications.—Based on the address to which the enrollee's cash benefit check is being mailed. For persons not receiving such benefits, the mailing address given at the time they applied for health insurance benefits is used. Temporary or permanent changes of residence are reflected in the data to the extent that such changes are reported to the SSA by enrollees.

All Areas.—Consists of the United States, Guam, Puerto Rico, Virgin Islands, all other areas, and foreign countries.

United States.—Consists of the 50 States, the District of Columbia, and residence unknown.

All Other Areas.—Consists of American Samoa, the Canal Zone, Canton Island, Caroline Islands, Mariana Islands, Marshall Islands, Midway Islands, and Wake Island.

County.—The primary divisions of the 50 States are, in general, counties. In Louisiana, however, these divisions are known as parishes. Alaska is divided into 21 economic areas, included here as the equivalent of counties. A number of cities that are independent of county organizations are reported separately in Maryland, Missouri, and Virginia. The divisions in Puerto Rico are called municipios. Guam and the Virgin Islands are not further subdivided.

County Unknown.—Data for a small number of enrollees do not permit identification of county of residence. The number of persons residing in such "unknown" counties are not shown separately but are included in State totals.

Metropolitan and Nonmetropolitan Counties.—The division of counties into metropolitan and nonmetropolitan groups is based on the list of standard metropolitan statistical areas (SMSA) as classified by the Bureau of the Budget.¹ Except in New England, each SMSA includes a county containing a central city of at least 50,000 inhabitants, based on the 1970 census. In addition, contiguous counties are included in the SMSA if they meet certain criteria of economic and social integration with the central city. In New England, an SMSA consists of towns and cities, rather than counties. However, the data included in this report were available only for counties. Therefore, for New England, the SMSA was replaced by the State metropolitan economic area (SMEA), which is defined in terms of whole counties. Metropolitan counties are those counties included in an SMSA or an SMEA. These counties were further divided into those with the central city of the SMSA and those without the central city. Nonmetropolitan counties are all counties not included in some SMSA or SMEA.

¹ U.S. Bureau of the Budget, *Standard Metropolitan Statistical Areas* (Washington, D.C.: U.S. Government Printing Office, 1967).
